

TAC Vista™ 5 Workstation

TAC Vista 5 Workstation makes it possible to create efficient supervision and financial control in buildings where different technical subsystems have been integrated to create maximum profitability. TAC Vista 5 Workstation is a monitoring, programming, configuration and commissioning tool, developed for system operators who require comprehensive control over their buildings. Information and decision basis from TAC Vista 5 Server are made available in real-time via TAC Vista 5 Workstation for authorized users, within TCP/IP-based Intranets.

- A dynamic interface for central operations supervision and financial control of modern buildings
- Adapted for power users such as staff with responsibility for building and system operation
- Creates dynamic information in real-time
- Intuitive user interface based on Windows® functionality
- Well defined standard technologies gives a future-proof openness
- TAC Vista 5 supports the FDA requirements and regulations

TAC VISTA 5 WORKSTATION – DYNAMIC INFORMATION AND DECISION BASIS IN REAL-TIME

The information from different technical subsystems in buildings is collected and processed in a TAC Vista 5 Server and will become available to all authorized users, for retrieval and analysis, via TAC Vista 5 Workstation.

Using this tool, graphical function screens and alarm lists are constructed, navigation within databases becomes possible, logs and trend logs become available and are easy to set up. Authorized users can make changes to values and systems can be reconfigured by using copy and paste.

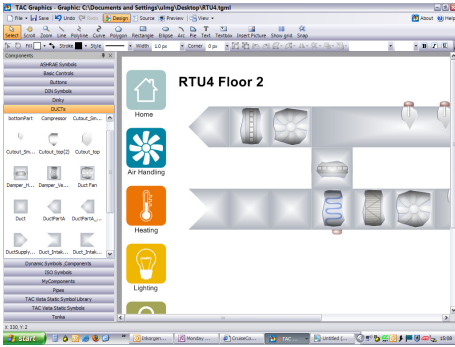

INFORMATION FROM THE BUILDING'S TECHNICAL SUBSYSTEMS AND EXTERNAL DATABASES

Data that is acquired from external databases can be used to facilitate technical operations, increase the service level for the tenants within the building, or create unique simulations allowing analysis of alternative investment options.

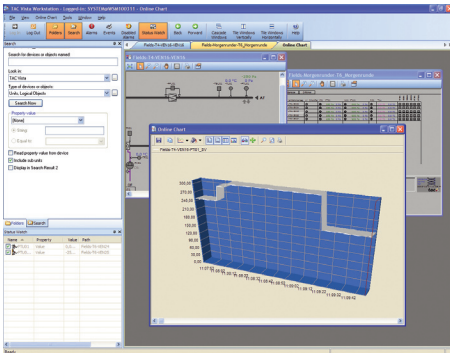

TAC VISTA 5 – THE COMPLETE PRESENTATION SYSTEM

TAC Vista 5 is a suite of software for controlling and monitoring the various technical subsystems of a building via LONWORKS®, DDE or OPC.

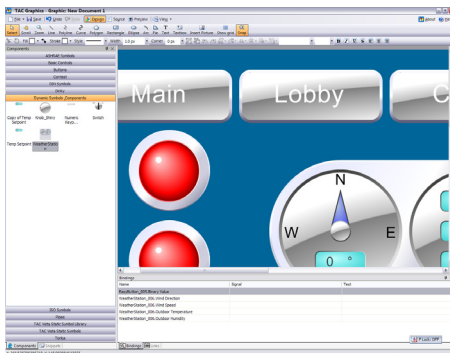

TAC Vista 5 gives different users access to all the information within the system. Everything, from lighting control to energy reporting, is accessible by means of the various modules within TAC Vista 5.

Monitor all aspects of how your building operates

Analyze to improve building performance

Tailormade graphics for appealing and easy-to-use interface

SECURITY

- Authorization checks via Windows® NT Security
- Log-in is encrypted and cannot be eavesdropped
- Log-in by username and password
- Well defined standard technologies gives a future-proof openness
- TAC Vista 5 supports the FDA requirements and regulations

FUNCTIONS IN TAC VISTA 5 WORKSTATION

- Graphical function screens
- Dynamic alarm and event list
- Online log
- Navigation
- Read and change values
- Read historical logs – for central operations
- View and create reports
- Configure automatic reports
- Create graphics
- User administration
- Customized graphical look
- Set up trend logs
- Powerful search function
